

# SAFETY DATA SHEET UNIVERSAL ACRYLIC THINNERS

According to Regulation (EC) No 1907/2006, Annex II, as amended by Regulation (EU) No 453/2010

SECTION 1: Identification of the	ne substance/mixture and of the company/undertaking
1.1. Product identifier	
Product name	UNIVERSAL ACRYLIC THINNERS
Product number	UAT, EUAT2.5L, EUAT05L, ZE
1.2. Relevant identified uses o	f the substance or mixture and uses advised against
Identified uses	Coatings.
Uses advised against	No specific uses advised against are identified.
1.3. Details of the supplier of the	ne safety data sheet
Supplier	ELECTROLUBE. A division of HK WENTWORTH LTD
	ASHBY PARK, COALFIELD WAY,
	ASHBY DE LA ZOUCH, LEICESTERSHIRE LE65 1JR UNITED KINGDOM
	info@hkw.co.uk
	+44 (0)1530 419600
	+44 (0)1530 416640
1.4. Emergency telephone nur	nber
Emergency telephone	+44 (0)1530 419600 between 8.30am - 5.00pm GMT Mon – Fri
SECTION 2: Hazards identification	ation
2.1. Classification of the subst	
2.1. Classification of the substa Classification (EC/1272/2008)	
Classification (EC/1272/2008)

The Full Text for all R-Phras	ses and Hazard Statements are Displayed in Se	ction 16.
SECTION 4: First aid meas	ures	
4.1. Description of first aid r	neasures	
General information	Get medical attention immediately. Show thi	is Safety Data Sheet to the medical personnel.
Inhalation	keep warm and at rest in a position comforta Loosen tight clothing such as collar, tie or be	elt. When breathing is difficult, properly trained ministering oxygen. Place unconscious person or
Ingestion	or milk to drink. Stop if the affected person for induce vomiting unless under the direction of should be kept low so that vomit does not er unconscious person. Move affected person position comfortable for breathing. Place un	e any dentures. Give a few small glasses of water eels sick as vomiting may be dangerous. Do not of medical personnel. If vomiting occurs, the head nter the lungs. Never give anything by mouth to a to fresh air and keep warm and at rest in a conscious person on their side in the recovery e. Maintain an open airway. Loosen tight clothing
Skin contact	Rinse with water.	
Eye contact	Rinse immediately with plenty of water. Rem apart. Continue to rinse for at least 10 minut	nove any contact lenses and open eyelids wide tes.
Protection of first aiders	suspected that volatile contaminants are stil personnel should wear an appropriate respire	protective equipment during any rescue. If it is I present around the affected person, first aid rator or self-contained breathing apparatus. Wash before removing it from the affected person, or id personnel to carry out mouth-to-mouth
4.2. Most important sympton	ms and effects, both acute and delayed	
General information	See Section 11 for additional information on described will vary dependent on the concert	health hazards. The severity of the symptoms ntration and the length of exposure.
Inhalation		adverse effects: Headache. Nausea, vomiting. ness, dizziness, disorientation, vertigo. Narcotic
Ingestion	May cause irritation.	
Skin contact	Redness. Irritating to skin.	
Eye contact	Irritating to eyes.	
4.3. Indication of any immed	diate medical attention and special treatment nee	eded

Notes for the doctor	Treat symptomatically.
SECTION 5: Firefighting meas	sures
5.1. Extinguishing media	
Suitable extinguishing media	The product is flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
5.2. Special hazards arising fro	om the substance or mixture
Specific hazards	Containers can burst violently or explode when heated, due to excessive pressure build-up. Flammable liquid and vapour. Vapours may be ignited by a spark, a hot surface or an ember. Vapours may form explosive mixtures with air. Fire-water run-off in sewers may create fire or explosion hazard.
Hazardous combustion products	Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
5.3. Advice for firefighters	
Protective actions during firefighting	Avoid breathing fire gases or vapours. Evacuate area. Keep upwind to avoid inhalation of gases, vapours, fumes and smoke. Ventilate closed spaces before entering them. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities.
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.
SECTION 6: Accidental release	e measures
6.1. Personal precautions, pro	tective equipment and emergency procedures
Personal precautions	No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage. Ensure procedures and training for emergency decontamination and disposal are in place. Do not touch or walk into spilled material. Evacuate area. Provide adequate ventilation. No smoking, sparks, flames or other sources of ignition near spillage. Promptly remove any clothing that becomes contaminated. Avoid inhalation of dust and vapours. Use suitable respiratory protection if ventilation is inadequate.
6.2. Environmental precaution	<u>S</u>
Environmental precautions	Avoid discharge into drains or watercourses or onto the ground. Avoid discharge to the aquatic environment. Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).

## 6.3. Methods and material for containment and cleaning up

Methods for cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Eliminate all ignition sources if safe to do so. No smoking, sparks, flames or other sources of ignition near spillage. Do not allow material to enter confined spaces, due to the risk of explosion. Approach the spillage from upwind. Small Spillages: If the product is soluble in water, dilute the spillage with water and mop it up. Alternatively, or if it is not water-soluble, absorb the spillages: If leakage cannot be stopped, evacuate area. Flush spilled material into an effluent treatment plant, or proceed as follows. Contain and absorb spillage with sand, earth or other non-combustible material. Place waste in labelled, sealed containers. Clean contaminated objects and areas thoroughly, observing environmental regulations. The contaminated assorbent may pose the same hazard as the spilled material. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.

#### 6.4. Reference to other sections

**Reference to other sections** For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.

### SECTION 7: Handling and storage

#### 7.1. Precautions for safe handling

Usage precautions	Read and follow manufacturer's recommendations. Wear protective clothing as described in
	Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimise spills. Keep container tightly sealed when not in use. Avoid the formation of mists. The product is flammable. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. In use may form flammable/explosive vapour-air mixture. Vapours may accumulate on the floor and in low-lying areas. Use explosion-proof electrical, ventilating and lighting equipment. Use only non-sparking tools. Take precautionary measures against static discharges. Suspected of damaging the unborn child. Pregnant or breastfeeding women should not work with this product if there is any risk of exposure. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment. Do not reuse empty containers.
Advice on general occupational hygiene	Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.
7.2. Conditions for safe storage	e, including any incompatibilities
Storage precautions	Store in accordance with local regulations. Eliminate all sources of ignition. Take precautionary measures against static discharges. Earth container and transfer equipment to eliminate sparks from static electricity. Keep away from oxidising materials, heat and flames. Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage. Bund storage facilities to prevent soil and water pollution in the event of spillage. The storage area floor should be leak-tight, jointless and not absorbent.
Storage class	Flammable liquid storage.
7.3. Specific end use(s)	
Specific end use(s)	The identified uses for this product are detailed in Section 1.2.
SECTION 8: Exposure Control	Is/personal protection

### 8.1. Control parameters

## Occupational exposure limits

### TOLUENE

Long-term exposure limit (8-hour TWA): WEL 50 ppm 191 mg/m<sup>3</sup> Short-term exposure limit (15-minute): WEL 100 ppm 384 mg/m<sup>3</sup> Sk

#### BUTANONE

Long-term exposure limit (8-hour TWA): WEL 200 ppm 600 mg/m<sup>3</sup> Short-term exposure limit (15-minute): WEL 300 ppm 899 mg/m<sup>3</sup> Sk

WEL = Workplace Exposure Limit Sk = Can be absorbed through the skin.

### **BUTANONE (CAS: 78-93-3)**

DNEL	Industry - Dermal; Long term : 1161 mg/kg/day Industry - Inhalation; Long term : 600 mg/m³ Consumer - Dermal; : 412 mg/kg/day - Inhalation; : 106 mg/m³ - Oral; : 31 mg/kg/day
PNEC	- Fresh water; 55.8 mg/l - Marine water; 55.8 mg/l - STP; 709 mg/l - Sediment; 284.7 mg/kg

- Soil; 22.5 mg/kg

### 8.2. Exposure controls

**Protective equipment** 

Appropriate engineering controls	Provide adequate ventilation. Personal, workplace environment or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Use process enclosures, local exhaust ventilation or other engineering controls as the primary means to minimise worker exposure. Personal protective equipment should only be used if worker exposure cannot be controlled adequately by the engineering control measures. Ensure control measures are regularly inspected and maintained. Ensure operatives are trained to minimise exposure. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilating equipment.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. Wear tight-fitting, chemical splash goggles or face shield. If inhalation hazards exist, a full-face respirator may be required instead.
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with European Standard EN374. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and

change them as soon as any deterioration is detected. Frequent changes are recommended.

Other skin and body protection	Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.
Hygiene measures	Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke. Preventive industrial medical examinations should be carried out. Warn cleaning personnel of any hazardous properties of the product.
Respiratory protection	Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with European Standard EN14387. Full face mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN136.
Environmental exposure controls	Keep container tightly sealed when not in use. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## **SECTION 9: Physical and Chemical Properties**

9.1. Information on basic phys	ical and chemical properties
Appearance	Clear liquid.
Colour	Colourless.
Odour	Organic solvents.
Odour threshold	Not available.
рН	Not available.
Melting point	Not available.
Initial boiling point and range	Not available.
Flash point	-7°C/19.4°F CC (Closed cup).
Evaporation rate	Not available.
Evaporation factor	Not available.
Flammability (solid, gas)	Not available.
Upper/lower flammability or explosive limits	Lower flammable/explosive limit: 1.9% Upper flammable/explosive limit: 10%
Other flammability	Not available.
Vapour pressure	2.9 kPa @ 20°C/68°F
Vapour density	Not available.
Relative density	0.85 @ 20°C/68°F
Bulk density	Not available.
Solubility(ies)	Insoluble in water. Soluble in the following materials: acetone Miscible with the following materials: Alcohols. Chloroform. Ether.

Partition coefficient	Not available.
Auto-ignition temperature	515°C/959°F
Decomposition Temperature	Not available.
Viscosity	Not available.
Explosive properties	Not considered to be explosive.
Oxidising properties	Does not meet the criteria for classification as oxidising.
9.2. Other information	
SECTION 10: Stability and rea	ictivity
10.1. Reactivity	
Reactivity	There are no known reactivity hazards associated with this product.
10.2. Chemical stability	
Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.
10.3. Possibility of hazardous	reactions
Possibility of hazardous reactions	The following materials may react strongly with the product: Oxidising agents.
10.4. Conditions to avoid	
Conditions to avoid	Avoid heat, flames and other sources of ignition. Containers can burst violently or explode when heated, due to excessive pressure build-up. Static electricity and formation of sparks must be prevented. Do not pressurise, cut, weld, drill, grind or otherwise expose containers to heat or sources of ignition.
10.5. Incompatible materials	
Materials to avoid	Oxidising materials. Acids - oxidising.
10.6. Hazardous decompositio	n products
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
SECTION 11: Toxicological int	formation
11.1. Information on toxicologi	cal effects
Acute toxicity - oral Notes (oral LD₅o)	Based on available data the classification criteria are not met.
Acute toxicity - dermal Notes (dermal LD₅₀)	Based on available data the classification criteria are not met.
Acute toxicity - inhalation Notes (inhalation LC50)	Based on available data the classification criteria are not met.
Skin corrosion/irritation Animal data	Irritating.
Serious eye damage/irritation Serious eye damage/irritation	Causes serious eye irritation.
Respiratory sensitisation	

Respiratory sensitisation	Based on available data the classification criteria are not met.
Skin sensitisation Skin sensitisation	Based on available data the classification criteria are not met.
Germ cell mutagenicity Genotoxicity - in vitro	Based on available data the classification criteria are not met.
Carcinogenicity Carcinogenicity	Based on available data the classification criteria are not met.
IARC carcinogenicity	Contains a substance which may be potentially carcinogenic. IARC Group 3 Not classifiable as to its carcinogenicity to humans.
Reproductive toxicity Reproductive toxicity - fertility	Based on available data the classification criteria are not met.
Reproductive toxicity - development	Suspected of damaging the unborn child.
Specific target organ toxicity -	single exposure
STOT - single exposure	STOT SE 3 - H336 May cause drowsiness or dizziness.
Target organs	Central nervous system
Specific target organ toxicity -	repeated exposure
OTOT I	
STOT - repeated exposure	STOT RE 2 - H373 May cause damage to organs through prolonged or repeated exposure.
STOT - repeated exposure <u>Aspiration hazard</u> Aspiration hazard	STOT RE 2 - H3/3 May cause damage to organs through prolonged or repeated exposure. Based on available data the classification criteria are not met.
Aspiration hazard	
Aspiration hazard Aspiration hazard	Based on available data the classification criteria are not met. Avoid contact during pregnancy/while nursing. The severity of the symptoms described will

### TOLUENE

## Carcinogenicity

IARC carcinogenicity

IARC Group 3 Not classifiable as to its carcinogenicity to humans.

## BUTANONE

Acute toxicity - oral

Acute toxicity oral (LD<sub>50</sub> 2,193.0 mg/kg)

	Species		Rat
	Acute toxicity - dermal		
	Acute toxicity dermal (LD₅o mg/kg) Species		5,000.0
			Rabbit
	Inhalation		Vapour may irritate respiratory system/lungs. Vapours may cause drowsiness and dizziness.
	Ingestion		May cause stomach pain or vomiting. May cause nausea, headache, dizziness and intoxication.
	Skin contact		Irritating to skin. Repeated exposure may cause skin dryness or cracking.
	Eye contact		Irritating to eyes.
SECTION 1	2: Ecological Inform	ation	
Ecotoxicity			rded as dangerous for the environment. However, large or frequent spills may have us effects on the environment.
12.1. Toxicit	<u>y</u>		
Toxicity	Based on available data the classification criteria are not met.		
Ecological ir	nformation on ingred	lients.	
			TOLUENE
	Acute toxicity - fish		LC₅₀, 96 hours: 24 mg/l, Fish
	Acute toxicity - aqu invertebrates	latic	EC₅₀, 48 hours: 19.6 mg/l, Daphnia magna
			BUTANONE
	Toxicity		Not considered toxic to fish.
	Acute toxicity - fish		LC₅₀, 96 hours: 3200 - 5600 mg/l, Fish
	Acute toxicity - aquinvertebrates	latic	EC₅₀, 48 hours: 7060 mg/l, Daphnia magna
12.2. Persis	tence and degradab	ility	
Persistence	and degradability	The degr	adability of the product is not known.
Ecological ir	nformation on ingred	lients.	
			BUTANONE
	Persistence and degradability		The product is readily biodegradable.
12.3. Bioacc	cumulative potential		
Bioaccumula	ative potential	No data a	available on bioaccumulation.
Partition coe	efficient	Not avail	able.

#### Ecological information on ingredients.

#### BUTANONE

Bioaccumulative potential No data available on bioaccumulation.

12.4. Mobility in soil

Mobility No data available.

Ecological information on ingredients.

#### BUTANONE

Mobility

The product is soluble in water.

12.5. Results of PBT and vPvB assessment

**Results of PBT and vPvB** This product does not contain any substances classified as PBT or vPvB.

Not determined.

assessment

12.6. Other adverse effects

Other adverse effects None known.

Ecological information on ingredients.

BUTANONE

Other adverse effects

### SECTION 13: Disposal considerations

#### 13.1. Waste treatment methods

General information	The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous.
Disposal methods	Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labelled with their contents. Incineration or landfill should only be considered when recycling is not feasible. Vapour from residual product may create a highly flammable or explosive atmosphere inside the container. Containers should be thoroughly emptied before disposal because of the risk of an explosion. Do not cut or weld used containers unless they have been thoroughly cleaned internally.

### **SECTION 14: Transport information**

### General

For limited quantity packaging/limited load information, consult the relevant modal documentation using the data shown in this section.

### 14.1. UN number

UN No. (ADR/RID)	1263	
UN No. (IMDG)	1263	
UN No. (ICAO)	1263	
UN No. (ADN)	1263	
14.2. UN proper shipping name	2	
Proper shipping name (ADR/RID)	PAINT	
Proper shipping name (IMDG)	PAINT	
Proper shipping name (ICAO)	PAINT	
Proper shipping name (ADN)	PAINT	
14.3. Transport hazard class(es)		
ADR/RID class	3	
ADR/RID classification code	F1	
ADR/RID label	3
